

Radial Arithmetic Facts Math Workbook (Adding and Subtracting 1-12): A Fun & Creative Visual Strategy to Practice Addition and Subtraction Facts

This colorful math book introduces a novel visual method for students to master their addition and subtraction facts for the numbers 1 thru 12. The creative design helps to engage student interest. These visual problems also help to develop visual skills. Visual strategies and graphic organizers are two major pedagogical approaches that research has shown to be effective learning methods. The illustrations of this book help students visualize their arithmetic facts with a radial representation. In this way, this book is related to current trends in classroom practices. This volume focuses on addition and subtraction facts using the numbers 1 thru 12 (in the case of subtraction, this means that the answers are no greater than 12 but numbers up to 12 may be subtracted from numbers as large as 24). The first few pages of each section (i.e. addition and subtraction) present the basic facts in an organized visual format. The next three pages present the same diagrams, but scrambled. The remaining diagrams of each section are divided into smaller pieces in order to provide more variety. A concise description of radial math including how to solve the problems is given in the introduction. There is also a completely answered, full-size example on the front cover. Studying these examples will help students become confident that they understand what to do. The interior is printed in full color with aesthetic visual patterns. The 8 x 10 pages are nearly the same size as standard school papers that students are used to working with. The copyright notice permits parents/teachers who purchase one copy to make photocopies for their own children/students only. This is very convenient if you have multiple children/students or if a child/student needs additional practice. Teachers may also wish to display these colorful problems using a projective camera or a transparency overhead

projector.

Et les renforts arrivent encore Bon ça sera la dernière revue de troupes de la semaine. Donc on arrive à 300 figurines il en reste donc 420... mais ça va ça avance bien. Je m'amuserais surtout sur les petites pièces. Là c'est du monobloc donc même si la ligne de moulage est visible -donc il faut barber presque tout le tour de la figurine... oui oui.- Comme chaque début de défi, je suis dans les temps, limite mieux qu'espérer. Mais par expérience je sais que c'est le creux du défi qui m'est fatal donc on verra quand j'aurais tout barbé :) Publié par CdtK à 17:37 4 commentaires: Liens vers cet article Envoyer par e-mail BlogThis! Partager sur Twitter Partager sur Facebook Partager sur Pinterest Libellés : Blabla lundi 1 août 2016 Revue des troupes Bon juste une petite photo pour montrer que je passe à l'infanterie. j'adore l'barbage. Oui certains diront que ça fait parti du hobby mais c'est vraiment ce que je teste le plus. Et puis là c'est de l'industriel. Publié par CdtK à 17:06 2 commentaires: Liens vers cet article Envoyer par e-mail BlogThis! Partager sur Twitter Partager sur Facebook Partager sur Pinterest Libellés : Blabla vendredi 22 juillet 2016 Pour une poignée de trous en plus Voilà les plaquettes de 6cm ont été percées... 1200 trous... oui oui. 1200 trous dans du plexi -vous savez le truc qui se colle une fois sur deux sur la machine. Mais voilà pour les 6cm c'est fini et je verrais pour les 8cm de front plus tard -je dirais fin août-. Mais à quoi ça correspond? Donc dire des trous c'est bien mais ça renseigne pas beaucoup alors 1200 trous c'est : 594 soldats -de léger à lourd- 231 cavaliers et 24 canons avec 4 artilleurs. Oui monsieur. Bon alors je suis désolé de ne pas avoir plus de soldats à pied. C'est pas super grave, je doute que toutes les plaquettes soient un jour sur la même table. Mais bon quand on voit que pour 30€ -3 plaquettes- j'ai pu faire celle là et autant en 8cm, ça va. Il faut voir ce que cela m'aurait coûté dans le commerce. On y rajoute le prix des aimants -15€ les 1000 fdpin- et j'ai quand même un très bon rapport qualité-prix par rapport à ce que je recherchais. Il le reste à barber les trous pour y glisser l'aimant et ça sera parfait je pourrais retourner mes figurines.
