

## Conducting and Magnetic Organometallic Molecular Materials (Topics in Organometallic Chemistry)

For several years, the two parallel worlds of Molecular Conductors in one hand and Molecular Magnetism in the other have grown side by side, the former essentially based on radical organic molecules, the latter essentially based on the high spin properties of metal complexes. Over the last few years however, organometallic derivatives have started to play an increasingly important role in both worlds, and have in many ways contributed to open several passages between these two worlds. This volume recognizes this important emerging evolution of both research areas. It is not intended to give a comprehensive view of all possible organometallic materials, and polymers for example were not considered here. Rather we present a selection of the most recent research topics where organometallic derivatives were shown to play a crucial role in the setting of conducting and/or magnetic properties in crystalline materials. First, the role of organometallic anions in tetthiafulvalenium-based molecular conductors is highlighted by Schlueter, while Kubo and Kato describe very recent ortho-metalated chelating ligands appended to the TTF core and their conducting salts. The combination of conducting and magnetic properties and the search for pd interactions are analyzed in two complementary contributions by Myazaki and Ouahab, while Valade focuses on the only class of metal bis(dithiolene) complexes to give rise to superconductive molecular materials, in association with organic as well as organometallic cations.

Et les renforts arrivent encore Bon ça sera la dernière revue de troupes de la semaine. Donc on arrive à 300 figurines il en reste donc 420... mais ça va ça avance bien. Je m'amuserais surtout sur les petites pièces. Là c'est du monobloc donc même si la ligne de moulage est visible -donc il faut barber presque tout le tour de la figurine... oui oui.- Comme à chaque début de défi, je suis dans les temps, limite mieux qu'espérer. Mais par expérience je sais que c'est le creux du défi qui m'est fatal donc on verra quand j'aurais tout barbé :) Publié par CdtK à 17:37 4 commentaires: Liens vers cet article Envoyer par e-mail BlogThis! Partager sur Twitter Partager sur Facebook Partager sur Pinterest Libellés : Blabla lundi 1 août 2016 Revue des troupes Bon juste une petite photo pour montrer que je passe à l'infanterie. j'adore l'barbage. Oui certains diront que ça fait parti du hobby

mais c'est vraiment ce que je d'Ã©teste le plus. Et puis l'Ã© c'est de l'industriel. PubliÃ© par CdtK Ã 17:06 2 commentaires: Liens vers cet article Envoyer par e-mail BlogThis! Partager sur Twitter Partager sur Facebook Partager sur Pinterest LibellÃ©s : Blabla vendredi 22 juillet 2016 Pour une poignÃ©e de trous en plus VoilÃ© les plaquettes de 6cm ont Ã©tÃ© percÃ©es... 1200 trous... oui oui. 1200 trous dans du plexi -vous savez le truc qui se colle une fois sur deux sur la mÃ©che. Mais voilÃ© pour les 6cm c'est fini et je verrais pour les 8cm de front plus tard -je dirais fin aoÃ»t-. Mais Ã© quoi Ã©sa correspond? Donc dire des trous c'est bien mais Ã©sa renseigne pas beaucoup alors 1200 trous c'est : 594 soldats -de l'Ã©ger Ã© lourd- 231 cavaliers et 24 canons avec 4 artilleurs. Oui monsieur. Bon alors je suis d'Ã©Ã©su de ne pas avoir plus de soldats Ã© pied. C'est pas super grave, je doute que toutes les plaquettes soient un jour sur la mÃ©me table. Mais bon quand on voit que pour 30e -3 plaquettes- j'ai pu fait celle lÃ© et autant en 8cm, Ã©sa va. Il faut voir ce que cela m'aurait coutÃ© dans le commerce. On y rajoute le prix des aimants -15e les 1000 fdpin- et j'ai quand mÃ©me un trÃ©s bon rapport qualitÃ©-prix par rapport Ã© ce que je recherchais. Il le reste Ã© Ã©barber les trous pour y glisser l'aimant et Ã©sa sera parfait je pourrais retourner Ã© mes figurines.
