

Elementary Inorganic Chemistry, Vol. 1 (Classic Reprint)

Of late years the teaching of Chemistry in schools has tended to assume more and more the character of research work, each pupil discovering his own facts (with a little guidance), and also interpreting them in their mutual connections. This method is admittedly of great value in cultivating the pupil's powers of accurate observation and manipulation; but from the point of view of the student who proceeds to college or University, there to continue the subject as part of a course in Science or Medicine, it leaves something to be desired. In even an elementary University course, the student is suddenly confronted by a bewildering multitude of details which he must learn from his lecture-notes or a text-book, for now the limited time at his disposal for practical work makes it impossible for him to acquire his material on the leisurely school lines to which he has become accustomed. This little volume has been written to help in bridging the gap here apparent. In it I have emphasised general principles, which shall enable the student to extend his firsthand laboratory knowledge in various directions, and to connect and correlate apparently isolated facts. No instructions for practical work are given, as any teacher can easily select from the many excellent manuals at his disposal those experiments which best typify the principles referred to. Although I have written the book throughout from the point of view of modern theory (so that the student on pursuing his studies shall have as little as possible to unlearn), I have studiously placed theoretical matters in the background, for the reason that in my own experience the beginner does not appreciate their proper significance. The school is, in my opinion, no place for chemical philosophy: that should only come at the end of an elementary University course, when the student has a good grip of the facts and (Typographical errors above are due to OCR software and do not occur in the

Et les renforts arrivent encore Bon ça sera la dernière revue de troupes de la semaine. Donc on arrive à 300 figurines il en reste donc 420... mais ça va ça avance bien. Je m'amuserais surtout sur les petites pièces. Là c'est du monobloc donc même si la ligne de moulage est visible -donc il faut barber presque tout le tour de la figurine... oui oui.- Comme chaque début de défi, je suis dans les temps, limite mieux qu'espérer. Mais par expérience je sais que c'est le creux du défi qui m'est fatal donc on verra quand j'aurais tout barbé :) Publié par CdtK à 17:37 4 commentaires: Liens vers cet article Envoyer par e-mail BlogThis! Partager sur Twitter Partager sur Facebook Partager sur Pinterest Libellés : Blabla lundi 1 août 2016 Revue des troupes Bon juste une petite photo pour montrer que je passe à l'infanterie. j'adore l'barbage. Oui certains diront que ça fait parti du hobby mais c'est vraiment ce que je teste le plus. Et puis là c'est de l'industriel. Publié par CdtK à 17:06 2 commentaires: Liens vers cet article Envoyer par e-mail BlogThis! Partager sur Twitter Partager sur Facebook Partager sur Pinterest Libellés : Blabla vendredi 22 juillet 2016 Pour une poignée de trous en plus Voilà les plaquettes de 6cm ont été percées... 1200 trous... oui oui. 1200 trous dans du plexi -vous savez le truc qui se colle une fois sur deux sur la machine. Mais voilà pour les 6cm c'est fini et je verrais pour les 8cm de front plus tard -je dirais fin août-. Mais à quoi ça correspond? Donc dire des trous c'est bien mais ça renseigne pas beaucoup alors 1200 trous c'est : 594 soldats -de l'âge lourd- 231 cavaliers et 24 canons avec 4 artilleurs. Oui monsieur. Bon alors je suis désolé de ne pas avoir plus de soldats à pied. C'est pas super grave, je doute que toutes les plaquettes soient un jour sur la même table. Mais bon quand on voit que pour 30€ -3 plaquettes- j'ai pu faire celle là et autant en 8cm, ça va. Il faut voir ce que cela m'aurait coûté dans le commerce. On y rajoute le prix des aimants -15€ les 1000 fdpin- et j'ai quand même un très bon rapport qualité-prix par rapport à ce que je recherchais. Il le reste à barber les trous pour y glisser l'aimant et ça sera parfait je pourrais retourner mes figurines.
