

## The House That Max Built

Having worked construction for many years, author and illustrator Maxwell Newhouse shows young readers step-by-step how houses are built in this captivating picture book. From drawing up the plans to excavating the site to laying the foundation, the unique and colorful paintings move through the seasons as Max builds the house of his dreams. Watch the framing crew as they build a floor frame to hold the house, raise the walls into place, and make the roof frame. See them install the windows and doors, bricklayers build the outside walls with bricks and mortar, and roofers nail the shingles into place. Follow the plumber as he puts in the water lines, the electrician as he installs the wiring, and the drywaller as he places wallboard on the inside walls. Along come the tile setter, floor layer, cabinetmaker, and painter, who all do their part to make Max's house beautiful as his mischievous little dog romps through the pages. Finally, when the property has been landscaped with plants, trees, grass, and stones, Max moves into his beloved new home. With a list of all the trades and a description of what they do, *The House That Max Built* is a must-have for any child with a natural curiosity and a passion to build things.

Et les renforts arrivent encore Bon ça sera la dernière revue de troupes de la semaine. Donc on arrive à 300 figurines il en reste donc 420... mais ça va ça avance bien. Je m'amuserais surtout sur les petites pièces. Là c'est du monobloc donc même si la ligne de moulage est visible -donc il faut barber presque tout le tour de la figurine... oui oui.- Comme à chaque début de défi, je suis dans les temps, limite mieux qu'espérer. Mais par expérience je sais que c'est le creux du défi qui m'est fatal donc on verra quand j'aurais tout barbé :) Publié par CdtK à 17:37 4 commentaires: Liens vers cet article Envoyer par e-mail BlogThis! Oui certains diront que ça fait parti du hobby mais c'est vraiment ce que je teste le plus. Et puis là c'est de l'industriel. Publié par CdtK à 17:06 2 commentaires: Liens vers cet article Envoyer par e-mail BlogThis! Partager sur Twitter Partager sur Facebook Partager sur Pinterest Libellés : Blabla vendredi 22 juillet 2016 Pour une poignée de trous en plus Voilà les plaquettes de 6cm ont été percées... 1200 trous... oui oui. 1200 trous dans du plexi -vous savez le truc qui se colle une fois sur deux sur la machine. Mais voilà pour les 6cm c'est fini et je verrais pour les 8cm de front plus tard -je dirais fin août-. Mais quoi ça correspond? Donc dire des trous c'est bien mais ça renseigne pas beaucoup alors 1200 trous c'est : 594 soldats -de l'âge à lourd- 231 cavaliers et 24 canons avec 4 artilleurs. Oui monsieur. Bon alors je suis désolé de ne pas avoir plus de soldats à pied. C'est pas super grave, je doute que toutes les plaquettes soient un

jour sur la même table. Mais bon quand on voit que pour 30€ -3 plaquettes- j'ai pu faire celle là et autant en 8cm, ça va. Il faut voir ce que cela m'aurait coûté dans le commerce. On y rajoute le prix des aimants -15€ les 1000 fdpin- et j'ai quand même un très bon rapport qualité-prix par rapport à ce que je recherchais. Il le reste à barber les trous pour y glisser l'aimant et ça sera parfait je pourrais retourner mes figurines.
